

National and international leaders participate in UNVEX'24

- **AESA, OCCAR and Mossos d'Esquadra to star in the first *Spotlight* session**
- **More than 160 speakers and 60 companies will be in Barcelona**

Madrid, 15 April - UNVEX'24 has secured the participation of key national and international leaders in the drone industry in its conference programme, as reflected in the first *Spotlight* session on June 4.

The director of the **Spanish Aviation Safety Agency**, **Patricia Pérez de Juan**; the director of the **Organisation for Joint Armament Cooperation (OCCAR)**, **Joachim Sucker**; the director of **Mossos d'Esquadra**, **Pere Ferrer**; and the co-founder of the consulting firm **Drone Industry Insight**, **Hendrik Bodecker**, will each give a presentation on their respective projects and the impact they have on the sector.

This first *Spotlight* covers one of the cornerstones of this edition of UNVEX, which is more international representation, as well as the exposure of the different applications and thematic areas: Europe, regulation, national and regional players, industry and procurement.

This is supported not only at the *Spotlight* sessions, but also by the conferences in the four theatres, each dedicated to a market: **Mobility, Security, Commercial and Technology Solutions**.

These conferences will be attended by the **European Directorates-General and Agencies in charge of Regulation**, as well as those related to **Innovation, prescribers and procurement departments**, who will present at UNVEX the situation and prospects for the development of these systems, which are becoming increasingly important in security, inspection and transport tasks.

In addition to the more than 160 speakers who compose the conference programme, more than **60 national and international companies** will be in **Hall 1 of the Fira de Barcelona** on **4 and 5 June**, ranging from large companies in the sector to entrepreneurial projects.

The UNVEX programme of activities concludes with a session of drone and RPAS **demonstrations**, which will take place at **Sabadell airport** on the afternoon of Wednesday 5 June.

About UNVEX:

UNVEX is a comprehensive event born in 2010 that has demonstrated its ability to generate business in the eight editions held in Spain and the four held in Latin America. Designed and developed by Metalia Group, the largest provider of content in dual-use technology markets, including www.infodron.es, the most widely read media in the drone sector. A Technical Committee selects the content of the conference programme, composed of qualified representatives. The exhibition is the largest ever held in Spain, and its demonstrations, pioneering at the time, include all types of remotely piloted unmanned systems and C-UAS.
